

**VV MVP-F – MATERIAL INTENT OF THE PROJECT**

---

**Obligatory Scheme for Basic Research**

Obligatory scheme must not exceed 15 pages.

Project Title	
Principal Investigator	
Applicant Organisation	
Statutory Representative/s of the Applicant	

**1. Excellence**

- Define the topicality of the addressed problem in the given field of science and technology and explain the originality of the project idea and the originality of the implementation
- Define the project objectives and describe their feasibility
- Describe the proposed methodology for the project, the justification for its selection and the extent to which it is capable of meeting the stated objectives.
- Characterise up to 5 of the most important outputs of the Principal Investigator's research over the last 5 years
- Characterise up to 5 of the most important projects carried out by the Principal Investigator in the last 5 years, characterise their project outputs
- Characterise the credentials of the Principal Investigator in the given field of research, his/her expertise and vision for research team building, further research development and career development
- Describe the competence of the participating research and implementing organisations to tackle the project
- Describe how the members of the research team work together, describe their complementarity and substitutability in implementation of the project
- Define the involvement of young R&D personnel up to 35 years of age, including PhD. students, in the project

free text

## 2. Impact

- Describe the significance of the preliminary results relevant to the project, the relevance of the proposed process of implementation to your own published results
- Define the benefits of the project for the development of knowledge and society
- Define the measures to maximise results and impact and how the project results will be communicated

free text

## 3. Implementation

4. Describe the work plan and deliverables, incl. roadmap, individual milestones and work packages
5. Describe how the project will be managed
6. Describe the implementation risks of the project implementation in relation to the expected results and how they can be mitigated
7. Describe the project's budget and how it will be used
8. Describe the existing infrastructure of the involved organizations and how they ensure a quality project implementation
