

VV MVP-F – MATERIAL INTENT OF THE PROJECT

Obligatory Scheme for Basic Research

Obligatory scheme must not exceed 15 pages.

Project Title	
Principal Investigator	
Applicant Organisation	
Statutory Representative/s of the Applicant	

1. Excellence

- Define the topicality of the addressed problem in the given field of science and technology and explain the originality of the project idea and the originality of the implementation
- Define the project objectives and describe their feasibility
- Describe the proposed methodology for the project, the justification for its selection and the extent to which it is capable of meeting the stated objectives.
- Characterise up to 5 of the most important outputs of the Principal Investigator's research over the last 5 years
- Characterise up to 5 of the most important projects carried out by the Principal Investigator in the last 5 years, characterise their project outputs
- Characterise the credentials of the Principal Investigator in the given field of research, his/her expertise and vision for research team building, further research development and career development
- Describe the competence of the participating research and implementing organisations to tackle the project
- Describe how the members of the research team work together, describe their complementarity and substitutability in implementation of the project
- Define the involvement of young R&D personnel up to 35 years of age, including PhD. students, in the project

free text

2. Impact

- Describe the significance of the preliminary results relevant to the project, the relevance of the proposed process of implementation to your own published results
- Define the benefits of the project for the development of knowledge and society
- Define the measures to maximise results and impact and how the project results will be communicated

free text

3. Implementation

- Describe the work plan and deliverables, incl. roadmap, individual milestones and work packages
- Describe how the project will be managed
- Describe the implementation risks of the project implementation in relation to the expected results and how they can be mitigated
- Describe the project's budget and how it will be used
- Describe the existing infrastructure of the involved organizations and how they ensure a quality project implementation
